

RESOLUTION No. 23-13 .

A RESOLUTION AUTHORIZING, ACCEPTING, AND ENTERING INTO A CONTRACT WITH REGENESIS FOR THE GROUND WATER REMEDIATION OF THE FORMER LEMPCO PROPERTY, AND DECLARING AN EMERGENCY.

WHEREAS, the Village solicited proposals from three (3) firms specializing in in-situ chemical injection for environmental remediation for the LEMPCO Brownfield Remediation Project, and

WHEREAS, the Village of New Lexington received three proposals and cost estimates regarding the ground water remediation; and

WHEREAS, Brownfield Restoration Group (BRG), LLC, environmental consultant, assisted the Village of New Lexington with the evaluation of all three proposals and recommends Regensis with a cost estimate of \$274,640.55; and

WHEREAS, the proposal for Regensis was the highest initial cost of the three proposals, BRG, and the Village of New Lexington believe that it represents the best approach in that the scope of remedial action is significantly more robust and appears far more likely to achieve the remedial objectives within a shorter period of time and without incurring extra costs during execution; and

NOW, THEREFORE, BE IT RESOLVED by the Council of the Village of New Lexington, Ohio:

Section 1: Mayor is hereby authorized to enter into the contract for Regensis to complete the ground water remediation based of the proposal attached and made part of this Resolution in the amount of \$274,640.55.

Section 2: Brownfield Restoration Group, LLC will oversee this contract as the Village's Certified Professional Environmentalist firm.

Passed: 4-3-23
